About Me

I am a highly motivated and passionate Bachelor of Information Technology graduate from the University of Moratuwa. I am eager to apply my academic knowledge in a practical environment, contribute to real-world software development projects, and further enhance my technical and problem-solving skills. I am seeking an opportunity to gain valuable industry experience through a challenging full-time or entry-level position.

Language

- English
- Sinhala

PROJECTS

WEB-BASED TAILORING ORDER MANAGEMENT SYSTEM with Laravel

University of Moratuwa, Sri Lanka

Crafting digital solutions for the fashion industry. Designed and developed a Web-Based Tailoring Order Management System for EasyLife Solutions using Laravel and MySQL, featuring intuitive interfaces, real-time tracking, and secure payment integration to transform the tailoring experience.

Real-Time Chat App with Laravel, Livewire, and Reverb

Building modern, real-time communication platforms. Architected and developed a Full-Stack Real-Time Chat Application using Laravel and Livewire, featuring instant messaging, "is typing" indicators, read receipts, and a complete friend/block management system to deliver a seamless and engaging user experience.

Housekeeping Management System with Laravel

Streamlining operations for the property management industry. Designed and deployed a Full-Stack Housekeeping Management System using Laravel, MySQL, and Docker, featuring role-based dashboards, interactive mobile checklists, and server-side GPS verification to ensure quality control and provide real-time oversight for property cleaning operations
